

Unique play attractions for schools and public places throughout the UK

CASE STUDY

BROADFIELDS SCHOOL

Location: London
Budget: £40,000
Installed: January 2021

We worked with Broadfields School to create a design for their KS2 playground to provide their children with a challenging and exciting climbing structure.

We discussed ideas for a robinia climbing structure for the KS2 playground and came up with a bespoke design that provided physical challenges and also created a great social space in the playground.

The natural looking climbing structure includes towers, a wobbly ladder, balance beams with overhead ropes, a climbing wall, a slide, a clamber net and a fireman's pole.

The new climbing structure has transformed the space the school has for play and created an exciting feature in the playground!
