

Unique play attractions for schools and public places throughout the UK

CASE STUDY

HALIFAX ACADEMY

Location: Halifax
Budget: £145,000
Installed: June 2022

Halifax Academy approached us with the intention of transforming their separate reception and year 1 playgrounds using all different elements - from climbing structures to dens, pebble pits, mud kitchens and colourful canopies. We worked closely with them to provide a mix of interactive stations for the children and create a fully immersive and inclusive playground for the younger children in the school.

The playground has two main areas and combined features: a tipi den, a snug den, a mud kitchen, water play, pebble play, parasols, an outdoor classroom, den building, welly storage and finally two different climbing structures - one with balance beams and overhead ropes and the other with a climbing wall and slide.

"The new play areas look amazing, they have had a massive impact to the exterior of the school. Thanks for your help and support on the project, great team."

- Ian Szefer, Halifax Academy
