

Unique play attractions for schools and public places throughout the UK

CASE STUDY

JEWELL ACADEMY

Location: Bournemouth
Budget: £20,000
Installed: July 2022

"Many thanks for your hard work with this project. We are delighted with the results which have created a beautiful space we can be proud of as well as limitless learning opportunities for our children. We hope to use your fantastic company again very soon."

- Kamala Kuhr, Early Years Leader

We worked with Jewell Academy to transform their play space to an interactive, encouraging environment. Working with the site constraints we encouraged the school to make use of the bank that they had considered moving and flattening. We designed and installed a small climbing structure featuring a clamber net, a clamber ramp, balance beams with overhead ropes and balance stumps. The platform had a sea themed canopy roof to the tower designed by Year 5 pupil Gracie, adding colour to the climbing structure and sparking the children's imagination.

in a separate area nearby we also installed a water play unit with a vertical pulley system, stainless steel water trays and 'log flumes' - helping the children to develop their motor and coordination skills. This was installed into a pebble pit to provide texture and surfacing to the playground, different from the rubber mulch surfacing underneath the climbing.
