

Unique play attractions for schools and public places throughout the UK

CASE STUDY

MAIDENHEAD SCHOOL

Location: Maidenhead
Budget: £30,000
Installed: May 2022

Maidenhead Nursery School had a compact space that they were looking to transform with climbing equipment suitable for their younger children. The climbing structure we designed had colourful rainbow themed canopy roof panels, wobbly ladder and step access, a rope bridge and a clamber ramp. The colourful roof panels cast beautiful shadows onto the platforms underneath them sparking children's imagination.

Alongside the climbing structure we also installed curved monkey bars and acrylic bars to provide a play feature that encourages more active play and enhances coordination skills. The playground was finished with a durable artificial grass safety surface underneath the climbing equipment.
