

Unique play attractions for schools and public places throughout the UK

CASE STUDY

PORTESBERY SCHOOL

Location: Hampshire
Budget: £30,000
Installed: May 2022

We were first invited to draft some ideas for a sensory trail for Portesbery School in autumn 2020. The school caters for pupils aged 2 to 19 who have additional sensory impairments, physical difficulties or challenging behaviour.

We worked with head teacher Nathan Aspinall and his staff to create a design that would enhance their existing concrete path set amongst trees to offer a sensory experience for the children.

Our design featured five beautiful tunnels to be set over the pathway - mirror, rainbow, ocean, leafy and 'swiss cheese' along with a wheelchair accessible bridge and hand rail for those needing the extra support.

In March 2022 the school had raised the funds and were ready to make the design become a reality! The end result is stunning and has given the school a really special area to enjoy.

The sensory pathway with dens has been incredibly well received by the school and the children love their new place space!

"The area is stunning and we are all so pleased. Great feedback from all so far. Really impressed with Natural Playscapes from start to finish and all communication from you has been exemplary. I would recommend you to other schools." - Nathan Aspinall, Headteacher
