

Unique play attractions for schools and public places throughout the UK

CASE STUDY

SARISBURY JUNIOR SCHOOL

Location: Southampton
Budget: £28,500
Installed: November 2021

Our brief for Sarisbury Junior School was to design a challenging new climbing structure for the children which includes bridges, balance scramble beams, a wobbly ladder, a bannister slide and a bespoke colourful panel to represent the local River Hamble. This was installed on rubber mulch which is a great surfacing material for climbing.

Dragonflies and bullrushes are featured on the bespoke colourful canopy panel which brightens up the play space as well as providing a talking point for the children to teach them about the local area.

The children absolutely love the new space and the play opportunities and challenges that it provides.
